

## MPAI-MMC: Multimodal Conversations for XR

Mark Seligman 2025/01/18

#### MPAI Standards and MPAI-MMC

- MPAI develops standards for:
  - **Components** (Al Modules AlM): their function, I/O data
  - Organised in workflows (Al Workflows AlW): their function, I/O data, AlM topology
  - Executed in an MPAI specified environment (AI Framework AIF): metadata, API
- Multi-modal Conversation (MMC) set of standards

Standard Name	Acronym	V		
Multimodal Conversation	MPAI-MMC	1.2		
- Automatic Speech Translation	HELLO HOLA			
- Conversation with Emotion				
- Multimodal Question Answering				

## Speech-to-Speech Translation

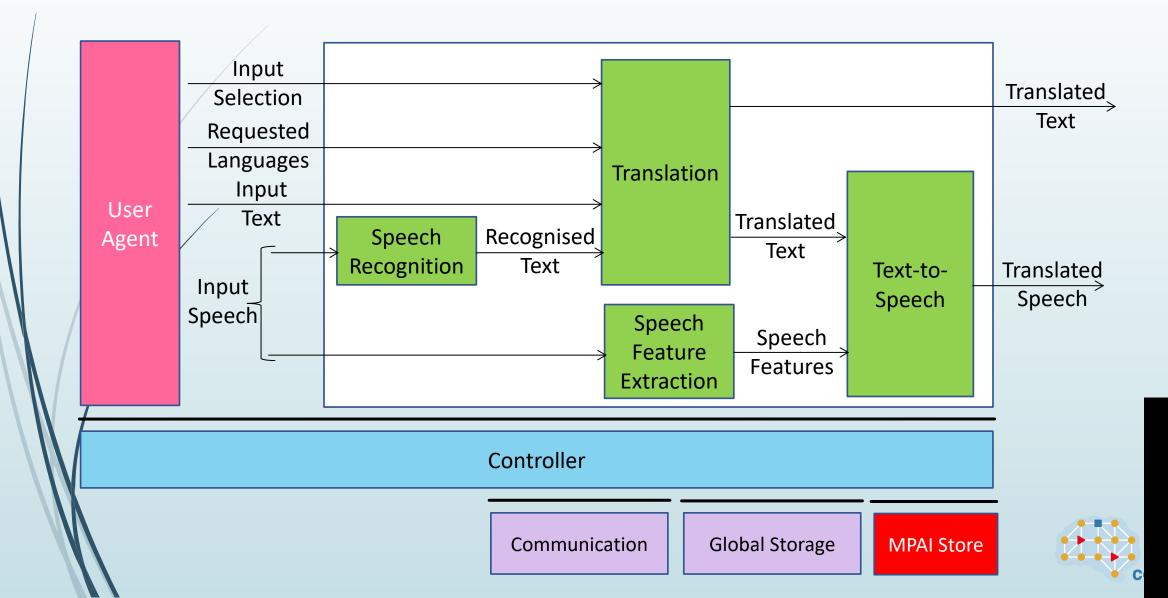

- Multilingual Conferencing!
- Spoken translation in the <u>original source-language voice</u>
- Many untouched <u>vertical markets</u>
- Multilingual social networking

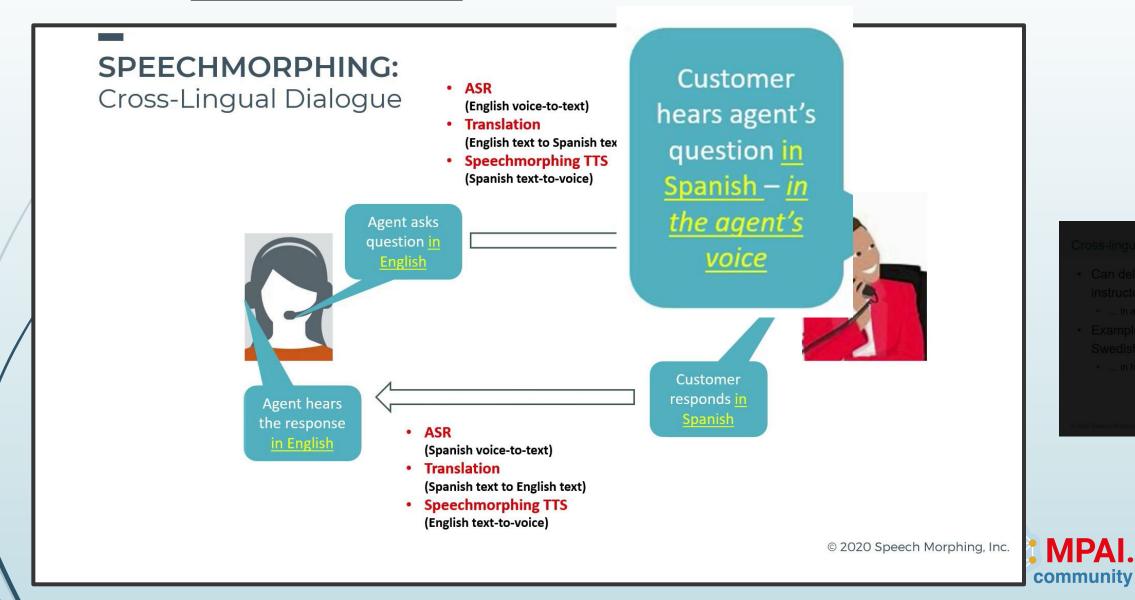

## Multilingual Conferencing

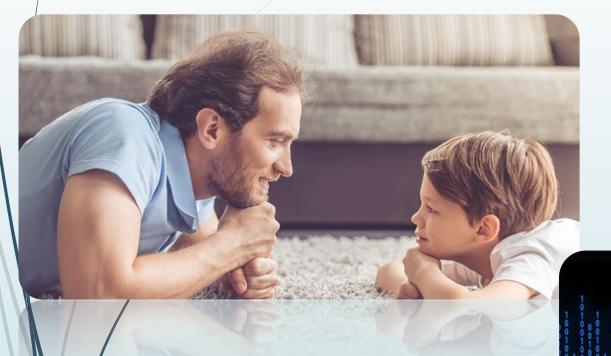

## S2S translation in <u>original source-language voice</u> and for <u>vertical markets</u>

#### Conversation with Emotion

Conversation with Human

Conversation with Machine

## Conversation between Human and Machine

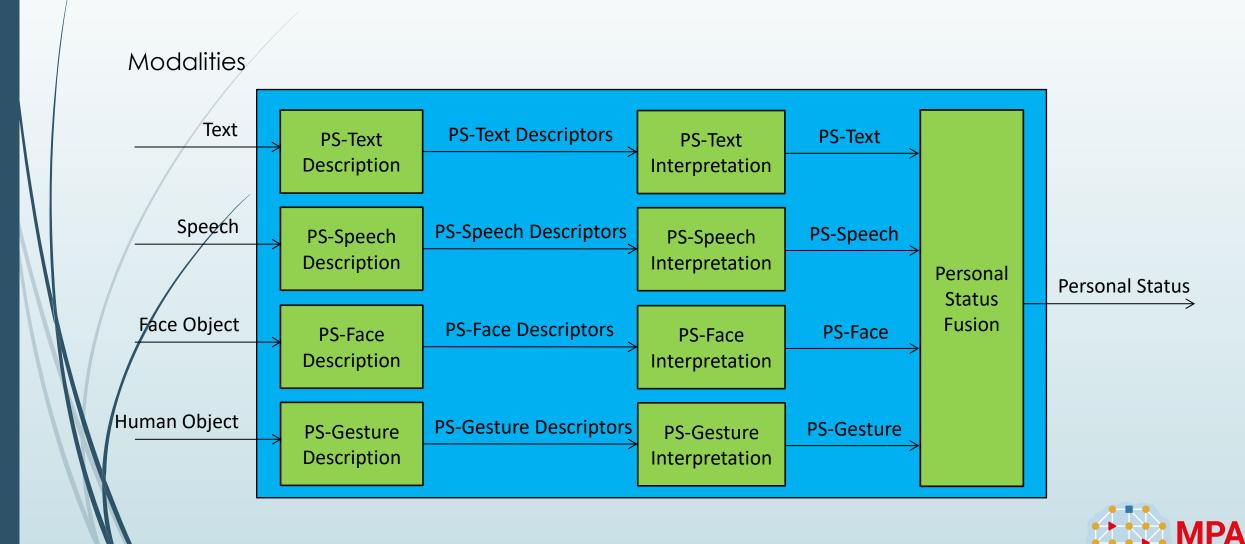

#### Personal Status

- MPAI defined Personal Status (PS) as a set of **internal human characteristics**:
  - 1. Emotion and Cognitive State result from human interaction with the Environment.
    - a. Cognitive State is more rational (e.g., "Confused", "Dubious", "Convinced").
    - b. Emotion is less rational (e.g., "Angry", "Sad", "Determined").
  - **a. Attitude** is the stance a human takes when s/he has reached an Emotion and Cognitive State (e.g., "Confrontational", "Respectful", "Soothing").
- PS is shown by a modality: *Text, Speech, Face and Gesture* and possibly by more than one modality simultaneously.
  - More modalities possible but currently not considered, e.g., the body as in body language, dance, etc.
- Personal Status Extraction: a composite AIM for extracting the PS of a human.
